

(Characteristics of Remote Physical & Psychological Attacks) 8/25/2025 Report

- ❖ Directed outside voices audible to Victim only – External sounds of voices discussing things only the victim knows used to distract and prevents victims from thinking about themselves, their family, friends, jobs, school, their business and responsibilities, overall from being productive within their own lives, including;
 - Psychologically talking victims into suicide, criminal acts, lashing out at people the voices talked the victim into believing are their attackers.
- ❖ Internal pain – electroshocks, zaps, (similar to taser assaults) victim's head, feet, hands, etc. chills and arthritic stiffening.
- ❖ Projections of outside images and videos into victim's mind, including dream manipulation.
- ❖ Gangstalking - Accessories to these crimes. These stalking members help distract Victims. Some of their tactics include:
 - Use of noise campaigns - such as sound effects devices where these play the sounds of footsteps, boxing falling, etc. to psychologically distract the victim from peace of mind, quiet enjoyment within their apartment / home.
 - Sitting in their vehicles or standing outside of victims home, then leave before victim notifies local police.
 - Noise from vehicles without the muffler driven by the victims home.
 - Gangstalkers who reside near a victim allow members of their criminal empire to live, eat & sleep in their homes and/or strategically place devices, weapons inside their home, within range of victim, to make it
